Shield

DAO

What is ShieldDAO?

Decentralized Organization (DAO), born from the Cover hack.

The goal of Shield is to provide decentralized, trustless, and non-KYC gated leveraged assets for providing Liquidity, Insurance, Staking, Governance, Lending and Borrowing. Shield assets do not require fund re-balancing or any form of debt

ShieldDAO Protocol Features

1.• Loss Mitigation

2.• Staking

3.• Governance

4.• Product Development

5.• Data Curation

Loss Mitigation

ShieldDAO uses a combination of strategies to mitigate loss. These include, among others, four key strategies: a. Risk avoidance by providing products and services of superior quality. b. Risk acceptance through setllement designed to compensate claimants for their losses. c. Risk reduction through risk/liability transfer. d. Subrogation by leveraging legal resources to ensure ShieldDAO solvency and its ability to meet claims obligations.
Staking & Governance

Staking

a. The ShieldDAO Community can stake digital assets to receive rewards.

b. The ShieldDAO Protocol Liquidity mining program allows stakers to actively earn a return on their stakes.

Governance

The vision of ShieldDAO is to create an operating system for trustless transactions by eliminating counterparty risk via disintermediating and decentralizing with machine consensus at the protocol and the smart contract levels.
Product Development

ShieldDAO blockchain product development is driven by community use case, proof of concept built and launched with data mapping, financial modeling, staging and commercialization strategies and governance implementation.

Data Curation

ShieldDAO data curation, using The Graph Protocol, helps manage data to make it more useful for users engaging in data discovery and analysis. Data curators collect data from diverse sources, integrating them into repositories that are many times more valuable than their independent parts.

Tokenomics SHIELD (SHD)

Token max. supply 100,000 SHD

- Liquidity Mining: 45,000 SHD [45%]

- Early Acquisition: 15,000 SHD [15%]

- Market: 15,000 SHD [15%]

- Team: 5,000 SHD [5%]

Tokenomics

- Testers: 5,000 SHD [5%]

- Research & Development: 5,000 SHD [5%]

- Airdrop & Bounty: 5,000 SHD [5%]

- Marketing: 3,000 SHD [3%]

- Legal: 2,000 SHD [2%]

ShieldDAO VAULT AND GOVERNANCE

- SHIELD VAULT (LIQUIDITY RESERVE)
- Liquidity Providers
- Shield Holders
- Shield Savings & Lending Rate
- Governance Plan
- Improvement Proposals
- Decision-making
- Use of Shield in the ShieldDAO Governance
- Polling and Executive Voting
